

## **Salaried Route**

For some trainees the salaried route is the preferred option. As a salaried trainee you are employed by the main placement school and as such you would begin teaching unsupervised from the beginning of term in September. Alongside your teaching commitments you would also be required to complete all of the online learning modules, attend the professional studies sessions and complete the written research assignments the same as those on the training route.

You can expect to be paid as an unqualified teacher which for 2019-20 is £18,843. Unlike the bursary, this is not tax free.
