

Testimonials

“I was concerned that at the age of 40, it would be impossible to change my career. Yet now with the support of the TES institute, I have the best job in the world. Working with children and inspiring them to fulfil their own dreams. Anything is possible and life really does start at 40”

“I'm pleased I chose to enter teaching via the School Direct route. Being integrated into a school and part of the team from day one is real advantage. The training is hands-on and challenging but I feel very well prepared for a career in teaching and ready to start my NQT year.”

“I have found the Schools Direct course to be a very valuable route into my teaching career. Experiencing school life from September through to June on the Schools Direct training course has giving me an insight into the teaching profession that I would not have experienced had I choose the university rout”.

“Since I joined the teacher training programme at West Hatch, it has made my experience as a teacher trainee a great one in the UK. Thank you for the consistent support and the amazing professional development, learning experience. West Hatch High School and NELTA have made my adventure in London positive and I cannot recommend this programme highly enough.”

“With the on-going support and specialist sessions from TES combined with the expertise of the staff at West Hatch the training programme allowed me to become a confident teacher whom was more than prepared for the NQT year. Training through schools direct provided me with classroom experience from the offset which, allowed me to start developing my own teaching style from the very beginning whilst, receiving support and ways to grow even stronger.”
